EXAM SOFTWARE PROPOSAL

SAI ECMAS ABACUS Exam Software

Proposal for the development of a structured Abacus examination platform designed to manage Level 1 to Level 9 examinations, automatically generate questions, provide student practice exams, manage students in bulk, provide individual student credentials and display examination performance results.

Prepared For: SAI ECMAS ABACUS

Prepared By: ERPLI

Platform: Web-Based Exam Software

01 / PROJECT OVERVIEW

Purpose of the Software

ERPLI proposes to develop an easy-to-manage examination system specifically for SAI ECMAS ABACUS. The software will help administrators manage students and examinations while providing students with their own secure login credentials and an easy examination experience.

The system will support nine Abacus levels. Questions can be automatically generated based on the student's assigned level, allowing examinations to be conducted efficiently without manually preparing an individual question paper for every student. Students will also be able to try a practice exam first so they can become comfortable using the platform before an official exam.

02 / FEATURES

Core Software Requirements

The proposed software will include the following major features.

01

Automatically Generated Questions

The examination system will automatically generate questions according to the Abacus level assigned to the student, reducing the requirement to manually prepare question papers.

02

Level 1 to Level 9 Support

The software will support a total of nine Abacus levels, allowing separate examinations and questions according to each student's assigned level.

03

Bulk Student Import Using CSV

Administrators will be able to upload multiple student records together using a CSV file instead of manually entering every student's information.

04

Individual Student ID & Password

Every student will receive an individual login ID and password that they can use to securely access their examination account.

05

"Are You Ready?" Confirmation

Before an examination begins, the student will see a confirmation popup asking **"Are you ready?"**. The examination starts only after confirmation.

06

Correct & Incorrect Result Summary

After completing the examination, the system will display the student's correct and incorrect answer totals as part of the final examination result.

07

Student Practice Exam

Students can take a level-appropriate practice exam to get familiar with the platform, answering questions, and submitting an exam. Practice results will be shown separately and will not affect official examination results.

03 / EXAM LEVELS

Complete Level 1–9 Structure

The examination software will be designed to manage all nine Abacus levels independently.

1 LEVEL	2 LEVEL	3 LEVEL
4 LEVEL	5 LEVEL	6 LEVEL
7 LEVEL	8 LEVEL	9 LEVEL

04 / WORKFLOW

Student Examination Flow

Students can optionally practise before moving on to their official examination.

1

Student Login

Student enters their unique ID and password.

2

Optional Practice

Student tries a practice exam to learn how the platform works.

3

Practice Feedback

Student sees practice results separately from official results.

4

Start Official Exam

Student confirms they are ready and starts the assigned exam.

5

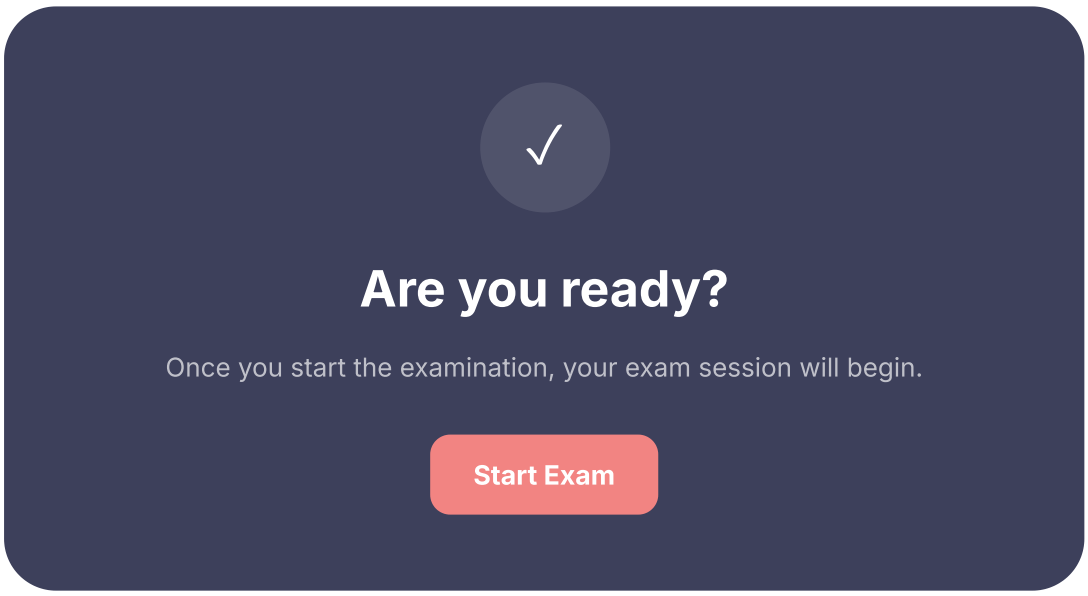

View Official Result

Correct and incorrect answer totals are displayed after submission.

05 / OFFICIAL EXAM EXPERIENCE

Exam Start Confirmation

A confirmation screen will help prevent students from accidentally starting their examination.

06 / RESULTS

Post-Exam Performance Summary

Once the exam has been completed, the software will provide a simple performance summary for the student. Practice results will remain separate from official examination results.

Correct

Total number of correctly answered questions will be shown.

Incorrect

Total number of incorrectly answered questions will be shown.

07 / DELIVERABLES

Included in the Proposed Software

- ✓ Level-based automatic question generation
- ✓ Level 1 through Level 9 examination support
- ✓ Bulk student upload through CSV
- ✓ Unique login ID for every student
- ✓ Individual student password
- ✓ Pre-exam "Are you ready?" confirmation
- ✓ Level-specific examinations
- ✓ Student practice exams with separate results
- ✓ Correct and incorrect answer summary

08 / PRICING & SUPPORT

Commercial Terms

A simple one-time project cost with the first year of hosting and technical support included at no additional charge.

TOTAL PROJECT COST

₹25,000

✓ One-Time Project Cost

Fixed Project Cost. Four Easy Milestones.

₹25,000 is the complete one-time development cost for the agreed software scope. No recurring software subscription or recurring development payment will be required in the future.

✓

First Year Included Free

You will receive **1 year of hosting** and **1 year of technical support** completely free of cost.

No extra hosting or technical support charges will apply during the first year.

↻

After the First Year

After completion of the first year, you may choose **AMC + Hosting for ₹4,000 per year.**

The AMC and hosting renewal is completely optional. There is no mandatory annual renewal.

100% OPTIONAL

PAYMENT SCHEDULE

Four-Stage Payment Structure

The ₹25,000 project development cost is payable at the following milestones.

STAGE 01

₹3,000

Advance — Project Initiation

Due upon confirmation of the proposal, before development begins.

STAGE 02

₹10,000

MVP Ready

Due when the Minimum Viable Product (MVP) is ready for demonstration and review.

STAGE 03

₹7,000

Project Ready

Due when all agreed features are complete and the software is ready for final review.

STAGE 04

₹5,000

Final Delivery & Handover

Remaining balance due at final delivery and project handover.

Total one-time development cost	**₹25,000**

Each installment is payable on reaching its corresponding milestone. These are installments of one fixed project price, not recurring subscription charges.

i **Important:** The ₹25,000 project amount is a one-time development cost paid in four stages. The ₹4,000 AMC + Hosting amount applies only after the first complimentary year and only if SAI ECMAS ABACUS chooses to continue these services.
